

## Dutch Media Industry Pensions Administration Agency receives quick value by using OUTSCAN

Grafische Bedrijfsfondsen (GBF), the pensions administration agency for the Dutch media industry, needed a cost effective technical risk assessment solution that was easy-to-deploy and could provide instant results.

### PREVIOUS SOLUTION

While GBF had previously used external consultants to perform scans, the frequency was too low and the resources needed from the organization were too intensive.

Ronald van Erven, MSc EMITA RE CISSP, Information Risk Officer / Information Security Officer at GBF, stated "Our firm needed to increase our scanning frequency. We needed tooling which could be quickly deployed and would take little to no effort to install, as well as produce instant results. This in a time when no extra budget was available. OUTSCAN was able to provide a suitable solution for these requirements."

### OUTPOST24 SOLUTION

GBF needed to increase their scanning frequency because the firm and the pension branch in the Netherlands were going through a transformation where customers needed to be able to access their information through a self-service portal, such as the pension register portal and GBF's own customer portal. At this time they decided to hire a permanent information risk officer in charge of ICT risks and began using OUTSCAN in coordination with their ICT operations department.

**"Using OUTSCAN is easy and can be deployed by people with basic technical knowledge."**

Ronald van Erven,  
MSc EMITA RE CISSP,  
Information Risk Officer,  
Information Security Officer at GBF

### ABOUT GBF

As the pensions administration agency for the Dutch media industry, GBF invests in product innovation processes and underlying processes. In the implementation of pension administration, asset management and policy and administrative support, focusing on the relevant benchmarks.

For pension fund that the cost per participant and customer satisfaction, asset management costs for asset management and the outperformance relative to a predetermined standard portfolio and the policy and administrative support that agreements made within the service are made. <http://www.gbf.nl>

Erven says "Through the OUTSCAN service provided by Outpost24, we are able to do trend analysis on risks and continuous in-depth technical risk assessments. We see the OUTSCAN service as a tooling in support of our ICT technical risk assessment process which in turn is part of our enterprise risk management framework."

#### RESULTS / BENEFITS

Previously, the time from beginning to plan a scan, running an assessment, producing reports and presenting results would have taken 3 weeks. Now with OUTSCAN, the process of scheduling to analyzing reports, confirming the systems of any reported issues and reporting to the senior ICT management team, the internal audit department, and the enterprise risk manager has been reduced to two days.

Grafische Bedrijfsfondsen (GBF) now has an easy to use technical risk assessment solution with the capability to do on-demand security assessments as frequently as needed.

"OUTSCAN has provided us with a good insight on potential risks, steeped our learning curve on the behavior of our ICT components, and given us a solid security partner in Outpost24. The savings that OUTSCAN is bringing is identifying technical ICT risks - thus preventing the firm from any operational, financial and legal risk and damage to our reputation and brand."

Ronald van Erven,  
MSc EMITA RE CISSP,  
Information Risk Officer,  
Information Security Officer at GBF

#### WHY GRAFISCHE BEDRIJFSFONDSEN (GBF) CHOOSES OUTPOST24

- \* Quick deployment
- \* Instant results
- \* Short learning curve
- \* Trend analysis and in-depth technical risk reporting
