

Olympic Air Deploys Outpost24's HIAB and OUTSCAN to Achieve PCI Compliance

Olympic Air needed a security solution that would enable the company to comply with the Payment Card Industry Data Security Standard (PCI DSS) by scanning the perimeter and internal network effectively and provide a clear view of its security status.

Previous Solution

Following its acquisition, Olympic Air was re-structured with new staff, management and systems put in place.

As a result, the company identified a need to deploy a vulnerability management solution that would help Olympic Air prove compliance with the PCI DSS and ensure applications and systems conformed to corporate security policy.

Outpost24 Solution

Michael Zorbadakis, Security, Network and Infrastructure Manager at Olympic Air was responsible for the solution search. He had previously experienced in-house and some proprietary vendor technology, but wanted a dedicated and comprehensive PCI compliance solution. Following a demonstration of Outpost24's OUTSCAN PCI product he knew he has found the proactive technology he needed to achieve his objectives.

ABOUT OLYMPIC AIR

Olympic was the first Greek airline becoming synonymous with safety and service. In 2009, the company was renamed Olympic Air after being acquired by the Marfin Investment Group (MIG) - the largest business group in South Eastern Europe, with more than 56,000 employees and a client base that exceeds 20 million people in 40 countries.

The new Olympic Air is more modern than ever and has a new vision, a new vigour, a new concept - with brand new cutting-edge aircraft, with innovative and pioneering services, with traditional Greek hospitality, and a renewed passion to offer even more.

In addition to this new momentum, leading technology, innovation, and pioneering, the new Olympic Air boasts one of the youngest fleets of aircraft in Europe, consisting of Airbus A319/A320s and Bombardier Dash 8s.

"Outpost24 set-up a demonstration installation and within 2 hours OUTSCAN PCI was up and running and scanned our systems all night," said Michael Zorbadakis.

"In the morning, the reports generated were excellent with amazing detail on our compliance status."

Results/Benefits

OUTSCAN PCI is delivered as an on-demand cloud service and automatically scans the perimeter enabling Olympic Air to easily detect vulnerabilities and manage remediation to protect the integrity of its customers' credit card data.

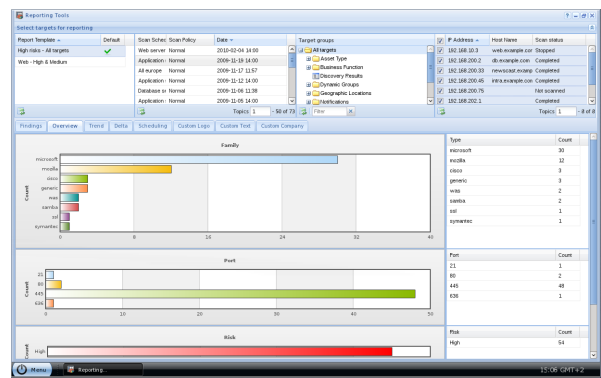

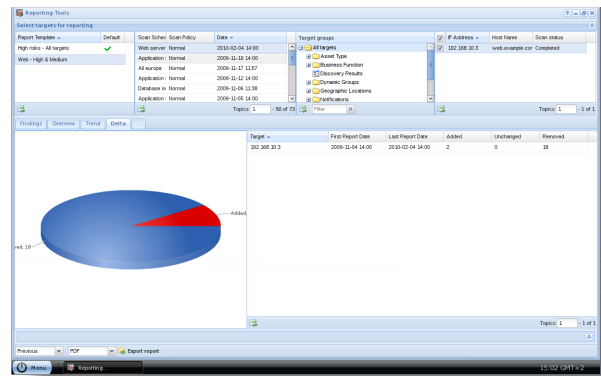

To satisfy all the scanning requirements within the PCI DSS, Olympic Air deployed the OUTSCAN PCI in combination with the Outpost24 HIAB, a plug and play appliance for internal scanning. Both products are immediately deployed and easy to use.

"The integrated OUTSCAN PCI and HIAB solution is extremely easy to set up and has an excellent user interface. I was particularly impressed and surprised by the detailed vulnerability analysis reports which can be tailored for management and technical staff, while the ability to schedule scans when we need them is highly beneficial," continued Zorbadakis.

Many services at Olympic Air are outsourced including the web server and our booking engine and it is essential that these services are secure and need to be scanned and checked for vulnerabilities. Deploying Outpost24 vulnerability management solution has enabled Olympic Air to achieve this aim and proactively protect against risks to the company and its passengers.

"With Outpost24 we now have a secure system. We are aware of any vulnerabilities before they are exploited and know the results of our actions to ensure all vulnerabilities are mitigated. Outpost24 has given us a clear view of our network and applications, inside and out," stated Zorbadakis. "The service support from Outpost24 is excellent and I know there is always back up there if I need it."

"We needed a tool for scanning, reporting and assigning tasks in a single platform and that is exactly what the Outpost PCI compliance solution is – an all in one package with excellent technical support from friendly staff. Its great value for money and the complete vulnerability management solution," concluded Zorbadakis.

WHY OLYMPIC AIR CHOSE OUTPOST24/KEYS TO SUCCESS

-  Detailed reports for management and technical staff
-  Simplicity of deployment
-  Excellent simple to use interface
-  Value for money
-  Single common platform
-  Valued support from technical team

ABOUT OUTPOST24: Vulnerability Management Made Easy! Outpost24 is the technology leader in on-demand vulnerability assessment and management solutions with over 1,000 corporate and government customers, including Traveler, Delta Lloyd Group, ING Life Limited, University of Helsinki, and Banco Multiva. Outpost24 is headquartered in Sweden with a global network of local sales offices. Outpost24 delivers security solutions in a Software-as-a-Service (OUTSCAN® & OUTSCAN PCI®) or Appliance (HIAB®) form factor. Outpost24's solutions provide fully automated network vulnerability scanning, easily interpreted reports, and vulnerability management tools. OUTSCAN PCI® is the ideal tool for businesses of all sizes to achieve and demonstrate PCI DSS compliance. For more information, please visit <http://www.outpost24.com>.
