

Software Developer

Outpost24 is one of Europe's leading proactive IT security companies and are currently looking for a highly skilled and motivated Software Developer. We constantly develop new, innovative solutions in risk and vulnerability assessments and management. Our customers are found worldwide in private and public sector such as in banks, insurance companies, municipalities and government agencies.

Do you want to work in a global and fast-growing company with world leading IT proactive security services and to help develop and improving our services?

The role as Software Developer in Outpost24 means you are part of a team that is developing core technology in our vulnerability assessment system for network and our web application scanner.

Qualifications

- Advanced Network programming in C in Linux environment
- Advanced knowledge and experience in Unix Shell Scripting, Perl, PHP, Ruby or Python
- Deep knowledge in system administration of Linux environments
- Bachelor in Computer Science or equivalent
- Experience and knowledge of performing penetration testing

This position is based in Karlskrona, Sweden.

How to apply

If you are interested, please apply by submitting your cover letter and your CV in English to Jesper Birch Jensen (birch@outpost24.com).
