

Outpost24 Vulnerability Management for Consultants

Market Landscape

The security landscape is always changing ensuring companies of all sizes face mounting challenges to protect their vital assets. Cyber criminals are increasingly taking advantage of software vulnerabilities in applications, operating systems and hardware that can cause irreparable damage to an organization's finances and reputation.

Companies are moving towards cloud computing and implementing virtualization projects, in order to seek cost efficiencies, meaning traditional reactive tools are no longer sufficient to protect organizations. With an increased security threat and most companies required to be compliant, vulnerability assessment and management is becoming a key consideration for organizations.

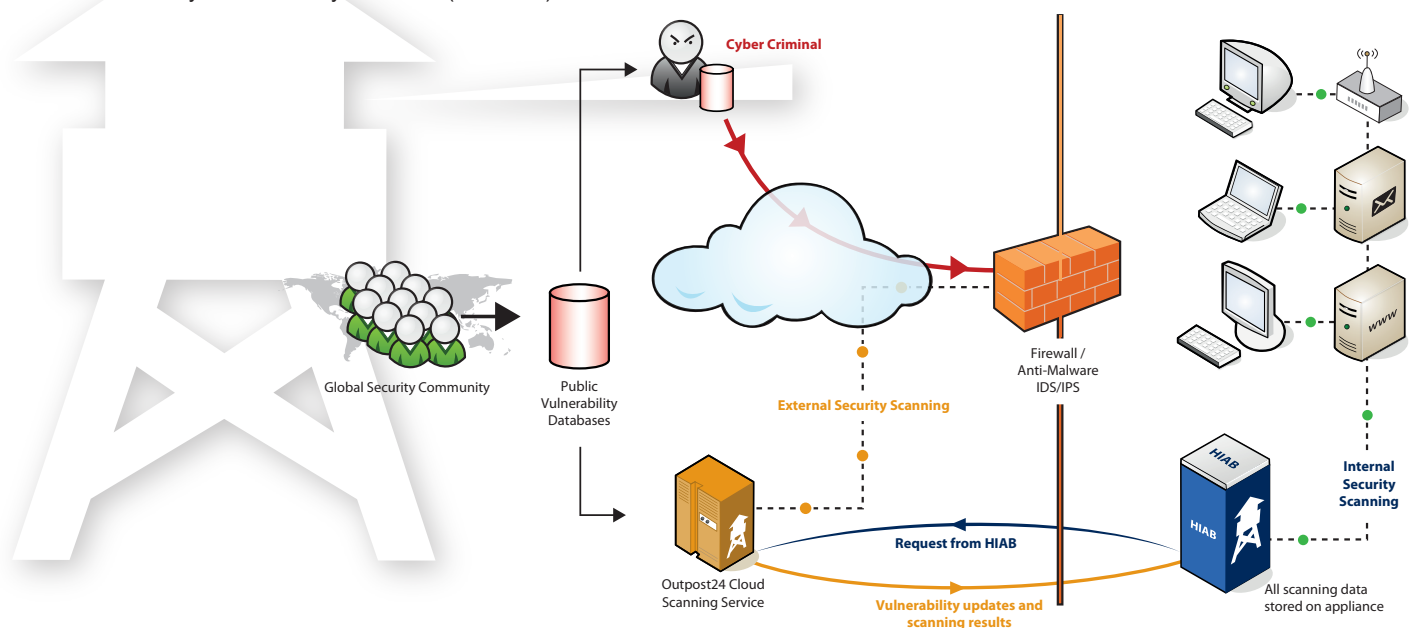

Outpost24 is committed to providing the leading vulnerability management solutions and its proprietary, best of breed technology has been deployed by over 1,000 organizations worldwide. Its unique approach to security allows companies to proactively manage and control critical risks to their network and help verify and prove compliance with standards including Payment Card Industry Data Security Standard (PCI DSS).

Outpost24 enables consultants to conduct the most accurate network auditing for their customers. Using Outpost24's agent less appliances integrated with cloud based services, consultants have the most advanced technology solutions available to conduct vulnerability assessments, compliance auditing and web application scanning, quickly and efficiently.

Consultant Program

Outpost24 has developed a program for consultants who want to conduct comprehensive vulnerability assessments for customers based on leading scanning technology that is easy to use and administer.

Consultants are offered a tailored package which includes provided a mini pc form factor of Outpost24's HIAB – a plug and play appliance integrated with a cloud scanning service to assess and manage both perimeter and internal vulnerabilities and optionally, conduct web application scanning.

With the small and convenient portable version of HIAB, consultants can conduct network audits within multiple customers' premises and provide a highly accurate picture of the risk to their customers' networks, with few false positives, and demonstrate the results with customized and valuable reports.

To ensure the highest levels of data confidentiality and privacy, the sensitive vulnerability reports are securely stored on the mini pc device.

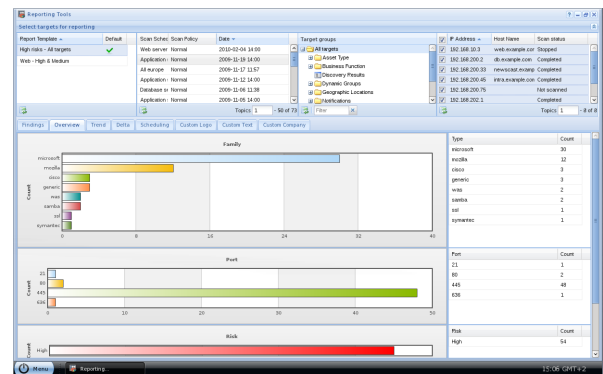

To ensure the highest levels of data confidentiality and privacy, the sensitive vulnerability reports are securely stored on the mini pc device.

ABOUT OUTPOST24: Vulnerability Management Made Easy! Outpost24 is the technology leader in on-demand vulnerability assessment and management solutions with over 1,000 corporate and government customers, including Traveler, Delta Lloyd Group, ING Life Limited, University of Helsinki, and Banco Multiva.
