

Outpost24 Vulnerability Management Made Easy

Overview

Outpost24 is a privately owned company that provides proactive network security solutions that assist organizations in protecting their critical assets and to mitigate evolving security risks. Founded in Sweden in 2001 to develop leading vulnerability management solutions, Outpost24's proprietary, best of breed technology provides the platform for organizations to implement a reliable vulnerability management process and achieve compliance with PCI.

Outpost24's advanced and complete technology solutions of cloud based services and agent less appliances are easy to implement, intuitive and highly accurate to provide lowest TCO. With offices in over 30 countries worldwide, enabling unrivaled local service and support, Outpost24 works closely with customers using a proven methodology to help them achieve their business objectives.

Market Landscape

Organizations today, of all sizes, face enormous security challenges in an increasingly hostile environment. Targeted attacks and new threats that exploit weaknesses in commonly used applications, operating systems and network components appear constantly, and can result in severe consequences for organizations from a loss of customer confidence, network downtime to theft of intellectual property and business secrets.

As businesses begin implementing virtualization projects and move towards cloud computing, the task of companies to secure their critical assets, and remain compliant, becomes increasingly difficult.

The essential task of protecting corporate networks has traditionally been achieved with reactive tools such as firewalls, anti-malware and intrusion prevention systems. With the security landscape constantly changing and providing greater threats, organisations need to take a proactive approach to security to effectively manage and reduce risk exposure, and to ensure compliance with increasingly demanding requirements.

Outpost24's unique approach to security allow companies to proactively manage and control critical risks to their network and help customers verify and prove compliance with standards including Payment Card Industry Data Security Standard (PCI DSS).

Solutions

Outpost24 offers leading proactive security solutions within the areas of:

Vulnerability Management

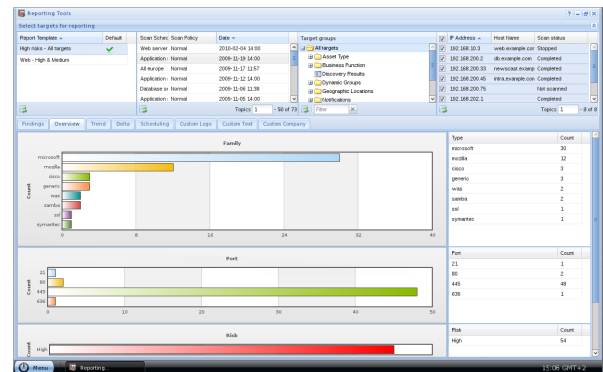

Outpost24 provides an easy to deploy and intuitive solution to continuously identify, remediate and mitigate vulnerabilities on the network. Automated vulnerability scanning is performed on a frequent basis to discover vulnerabilities which are then rated and reported with a recommended remedy.

PCI Compliance

Outpost24 offers a single user friendly tool based on leading technology to verify and prove the compliance of credit card data handling with PCI Data Security Standard. As an Approved Scanning Vendor (ASV) by the PCI Security Standards Council, Outpost24 assists customers in being PCI compliant with perimeter, internal and web applications scanning.

Web Application Scanning (WAS)

Outpost24 has a complete solution that automatically scans thousands of web pages for vulnerabilities quickly and easily. Scanning both web server and web application layer, Outpost24 offers a cost-efficient, accurate and easy way of assessing web applications.

Products

Outpost24's advanced proprietary technology has market leading vulnerability coverage, high scanning accuracy, flexible licensing and is non-intrusive to maintain network availability. Products offerings are cloud based services uniquely combined with a plug-and-play agent less appliance solution.

OUTSCAN – an affordable, on-demand cloud service for perimeter vulnerability assessment. Combines ease of use with rich functionality and a powerful vulnerability scanning engine to provide the lowest number of false positives.

HIAB – a plug and play appliance for perimeter and internal vulnerability and assessment management. With a web-based interface and agent less architecture, sensitive reports are securely stored on the HIAB appliance, never leaving the internal network.

OUTSCAN PCI – an on-demand cloud service PCI compliance verification. With no installation or maintenance required provides fully automated network scanning, easily interpreted reports and 24x7 technical support.

Outpost24 also offers WAS as an add-on to both OUTSCAN and HIAB to provide advanced web application scanning capabilities.

Customers

Outpost24's proactive security solutions have enabled over 1,000 companies to avoid exploitation of their corporate networks. Deployed across multiple industry sectors including Transport, Finance, Education, Government, Healthcare, Retail and Media, our customers range from small local businesses to multinational organizations and include Europcar, Travelex, Delta Lloyd, EDF Energy, Generali, Arcelor Mittal, Grupo Salinas and Deutsche Postbank.

People

Outpost24 is a company with an experienced and truly international management team and has a carefully selected group of IT security experts with a unique skill set in vulnerability management. The Outpost24 research team has discovered numerous vulnerabilities in core components in communication protocols and applications that have been internationally recognised by the industry.

With a network of more than 30 local offices around the world in Europe, Middle East and Africa, Asia Pacific and The Americas, Outpost24 is a true global organization that can serve its customers locally.

ABOUT OUTPOST24: Vulnerability Management Made Easy! Outpost24 is the technology leader in on-demand vulnerability assessment and management solutions with over 1,000 corporate and government customers, including Travelex, Delta Lloyd Group, ING Life Limited, University of Helsinki, and Banco Multiva. Outpost24 is headquartered in Sweden with a global network of local sales offices. Outpost24 delivers security solutions in a Software-as-a-Service (OUTSCAN® & OUTSCAN PCI®) or Appliance (HIAB®) form factor. Outpost24's solutions provide fully automated network vulnerability scanning, easily interpreted reports, and vulnerability management tools. OUTSCAN PCI® is the ideal tool for businesses of all sizes to achieve and demonstrate PCI DSS compliance. For more information, please visit <http://www.outpost24.com>.
