

Perimeter Vulnerability Management OUTSCAN

Market Landscape

The amount of information that companies produce and store on their networks is increasing exponentially, enhancing the dependency on IT. As data tends to be sensitive, and critical for business' operations, it is essential that the data and their IT systems are secure, as any vulnerability exploited can lead to direct and indirect loss of income.

Traditionally, companies have deployed reactive tools such as firewalls, anti-malware and intrusion prevention systems to protect their corporate networks, but with the explosion in vulnerabilities, these are simply not enough.

As criminals become more sophisticated in their ability to penetrate networks, the use of mobile devices increases and companies move towards cloud computing, vulnerability management has increased in importance to help organizations address their critical security challenges.

Outpost24's proactive approach to security allows companies to continuously identify security risks and effectively manage and control them. Outpost24 offers a proven solution for perimeter vulnerability management based on leading core vulnerability scanning technology and a methodology that enable customers to implement easily and rapidly benefit from the results.

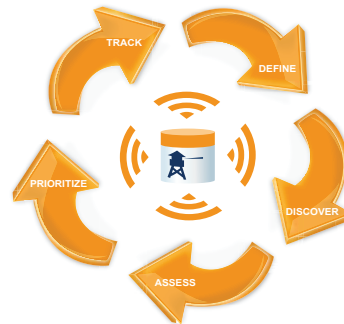

Our Approach

At the core of Outpost24's proactive approach to vulnerability management is the customer. Outpost24 aims to help the customer by identifying their real requirements and raising the awareness of threats, the implications and provide the best of breed technology to protect their network.

The company works closely with customers and builds a valuable strategic partnership providing trusted advice. Outpost24's local team assess and validate their risk status, identify business objectives and recommend a solution that accurately supports the process and achieves their desired business goals.

Methodology

During the last decade, Outpost24 has developed a Vulnerability Management Methodology that follows the industry standard set by the National Institute for Standards and Technology Special Publication 800-40. The proven methodology has been implemented at over 1000 corporate and government customers worldwide by our experienced and talented team of security professionals.

Define the program

Establish roles, responsibilities and goals to ensure best results. Define a security policy based on risk aversion, threat exposure and costs

Discover and manage assets

Use powerful and flexible management tools to discover the assets in network and enable customers to group by business unit, software environment, location, etc

Assess the network

Schedule scanning based on best practice and security policy. Use out of the box templates to scan or create scanning templates based on individual needs

Prioritize remediation

Analyze reports and review descriptions and recommendations to make decisions on what to fix. Basing the security policy on industry accepted risk scores facilitates an efficient vulnerability management process

Track progress

Use trending features to show statistics over time about risk exposure and vulnerabilities in the network. Create customer comparative reports to show what is changing and how things are improving

OUTSCAN

Deploying OUTSCAN, an affordable, on-demand cloud service from Outpost24, enables organizations to assess and manage perimeter risk exposure. Combining rich functionality and a powerful vulnerability scanning engine, OUTSCAN scans the perimeter enabling customers to easily detect vulnerabilities and manage remediation to prevent criminals from penetrating their network.

Key Features

Centralized Administration

- 🚩 System to allow users different roles and rights.
- 🚩 Remediation ticket system and verification scanning to track mitigation.
- 🚩 Flexible system for grouping network components.

Analysis

- 🚩 Highly accurate identification of vulnerabilities and elimination of false positives and negatives.
- 🚩 Customized reporting options and an customizable dashboard overview.
- 🚩 Risk rating system based on CVSS v.2.

Automated

- 🚩 Powerful asset discovery tools.
- 🚩 Agent-less scanning technology.
- 🚩 Automatic updating of vulnerability checks and features.

Scalable

- 🚩 Flexible licensing with full scalability to adapt scope to current demands.
- 🚩 Vast support for scanning of all types of network technologies, constantly evolving to meet demands.

Accurate

- 🚩 Security of all information is protected to ensure its confidentiality, integrity, and availability.
- 🚩 Market leading vulnerability coverage.
- 🚩 Highly accurate detection of Cross Site Scripting and SQL Injection vulnerabilities in web applications.

Customer Endorsements

“OUTSCAN has really provided us with the ability to detect potential vulnerabilities in our network perimeter to validate that we have the level of security and compliance we need.”

- Mike Grootveld,
Security Specialist CISM/CISSP,
Delta Lloyd Group

Key Benefits

Some of the key benefits of implementing the OUTSCAN proactive solution from Outpost24 include:

Reduced cost – the cloud service deployment ensures only operating expenses required

Ease of deployment and use – immediately deployed with an easy to use and intuitive web interface

Improve accuracy – extensive vulnerability database updated on a daily basis and few false positives

Support – unlimited phone and email support provided by security experts 24/7/365

Licensing – unlimited number of users and flexible licensing models

ABOUT OUTPOST24: Vulnerability Management Made Easy! Outpost24 is the technology leader in on-demand vulnerability assessment and management solutions with over 1,000 corporate and government customers, including Traveler, Delta Lloyd Group, ING Life Limited, University of Helsinki, and Banco Multiva. Outpost24 is headquartered in Sweden with a global network of local sales offices. Outpost24 delivers security solutions in a Software-as-a-Service (OUTSCAN® & OUTSCAN PCI®) or Appliance (HIAB®) form factor. Outpost24's solutions provide fully automated network vulnerability scanning, easily interpreted reports, and vulnerability management tools. OUTSCAN PCI® is the ideal tool for businesses of all sizes to achieve and demonstrate PCI DSS compliance. For more information, please visit <http://www.outpost24.com>.
